

Bathroom Design Considerations

PRIVACY AND NATURAL LIGHT

Make your bathroom a personal retreat. Skylights afford more privacy and let more light in. Replacing wall windows with skylights can also create space for other bath amenities.

OPEN A SNUG SPACE

Resolve space issues where wall windows don't fit. Skylights...the only source of light you need.

AIRY SURROUNDINGS

Remove steam and humidity from your bath. Venting skylights and roof windows minimize condensation in high-humidity areas. Create a chimney effect removing hot, moist ceiling air and drawing in fresh air through lower windows.
